# Usage of Message Versions

<table>
<thead>
<tr>
<th>Message version</th>
<th>Usage</th>
</tr>
</thead>
<tbody>
<tr>
<td>BAPLIE 1.5 1)</td>
<td>still in use – 91-1</td>
</tr>
<tr>
<td>BAPLIE 2.2.1 (VGM)</td>
<td>frequently used – D.95B</td>
</tr>
<tr>
<td>BAPLIE 3.1.1 (VGM)</td>
<td>still rarely used – D.13B</td>
</tr>
<tr>
<td>MOVINS 2.1.2</td>
<td>frequently used – D.95B</td>
</tr>
<tr>
<td>MOVINS 3.0</td>
<td>publication still pending – D.19A</td>
</tr>
</tbody>
</table>

1) message version no longer maintained
Activities

BAPLIE extension for “agreed number of slots”

Discussion about new version BAPLIE 2.3 referring to code lists

Design of MOVINSv3

- Definition of features
- Message structure (basically inherited from BAPLIEv3)
- Develop guidelines for usage of Edifact groups, segments, composites and data elements
- Definition of new codes
  - Finalize Message Implementation Guide
